SUMMARY

Front-end developer with 4+ years of experience building responsive and user-focused web applications. Skilled in React, React Native, and TypeScript, with hands-on experience in full-stack development using the MERN stack. Passionate about solving real-world problems and delivering impactful solutions through clean, scalable code.

PROFESSIONAL EXPERIENCE

NIBO

LAGOS, NIGERIA

Lead Frontend Developer

June 2023 - October 2024

- Initiated and led the development of a new system architecture, streamlining the management of complex spatial data requests; achieved measurable outcomes, including reducing response times per request during trial phases.
- Created manufacturer metrics dashboard that increased sales by 23% by tracking customer behavior patterns and purchase trends. Enabled data-driven decisions that reduced response time to customer feedback from 72 to 24 hours and improved product adoption rates by 35%.
- Implemented GraphQL to replace REST API endpoints, reducing API requests by 67% and decreasing average page load time from 3.2s to 1.1s, while improving data consistency across the application.

AJE

ISTANBUL, Turkey

Frontend Web Developer

September 2024 - Present

- Played a key role in the end-to-end development of a web application, leveraging modern web technologies to create a user-friendly interface and seamless functionality. This initiative significantly boosted the application's market outreach potential by 80%, enabling broader audience engagement and driving business growth.
- Implemented a real-time chat interface with complete trade process integration, enabling seamless communication between users and supporting actions such as offer creation, negotiation, and transaction finalization within the chat environment.
- Designed a visually appealing and highly effective email template for push notifications, focusing on personalization and clear call-to-actions, resulting in a 75% improvement in user engagement and satisfaction.

PROJECTS

BeYou

November 2023 - October 2024

- Engineered a personalized learning platform using React.js and Gemini AI API, enabling content generation based on individual learning styles and goals
- Implemented real-time progress tracking system with Firebase, achieving 98% data synchronization and reducing load times by 45%.
- Built responsive UI components using Tailwind CSS, resulting in consistent experience across devices with 100% all round lighthouse score.
