SUMMARY

Frontend-focused software developer with 4 years' proven success delivering high-performance web and mobile apps in React and TypeScript. Expert at architecting MERN-stack solutions that balance maintainability with user-centric design. Passionate about writing clean, testable code that solves real-world problems.

PROFESSIONAL EXPERIENCE

NIBO

LAGOS, NIGERIA

Lead Frontend Developer

October 2024 - Present

- Initiated and led the development of a new system architecture, streamlining the management of complex spatial data requests; achieved measurable outcomes, including reducing response times per request during trial phases.
- Created manufacturer metrics dashboard that increased sales by 23% by tracking customer behavior patterns and purchase trends. Enabled data-driven decisions that reduced response time to customer feedback from 72 to 24 hours and improved product adoption rates by 35%.
- Configured GraphQL to replace REST API endpoints, reducing API requests by 67% and decreasing average page load time from 3.2s to 1.1s, while improving data consistency across the application.
- Established a clear, logical folder structure in our React/TypeScript project to keep code organized and easy to navigate.

AJE

ISTANBUL, Turkey

Frontend Web Developer

September 2024 - Present

- Contributed to the end-to-end development of a large-scale Next.js application, collaborating with a cross-functional team to architect a scalable data layer using TanStack Query. Implemented ISR and SSR for sub-2 s page loads, optimized API calls to reduce data-fetch latency by 60 %, and helped drive an 80 % boost in user engagement and market reach.
- Implemented a real-time chat interface with complete trade process integration, enabling seamless communication between users and supporting actions such as offer creation, negotiation, and transaction finalization within the chat environment.
- Developed and maintained reusable React components and hooks library, streamlining feature development across multiple projects and reducing duplicate code by 40%.
- Designed a visually appealing and highly effective email template for push notifications, focusing on personalization and clear call-to-actions, resulting in a 75% improvement in user engagement and satisfaction.

FREELANCE

LAGOS, Nigeria

Frontend Development Instructor

September 2022 - June 2023

- Delivered personalized frontend development lessons to beginners, focusing on HTML and CSS fundamentals.
- Curated 10+ custom lesson plans and practical projects to fit each learner's pace and goals.
- Taught key concepts such as semantic HTML, CSS styling, page layout, and responsive design.
- Maintained a 100% parent satisfaction rate, with positive feedback on both teaching style and student growth.
- Successfully helped 7 students build their first functional web pages from scratch.

PROJECTS

BeYou([LINK](#))

November 2024 - February 2025

- Engineered a personalized learning platform using React.js and Gemini AI API, enabling content generation based on individual learning styles and goals
- Engineered 10+ interactive UI components with smooth transitions and animations using Framer Motion, decreasing user bounce rate by 15% and improving overall engagement metrics on key pages.

SKILLS

FRONTEND: REACT, REACT NATIVE, SVELTEKIT NEXTJS, TAIWINDCSS, TYPESCRIPT, GSAP/MOTION

BACKEND & CLOUD: SPRINGBOOT, EXPRESSJS, MONGODB, AWS

OTHER: GIT, POSTMAN, DOCKER, PYTHON

EDUCATION

University of Lagos,

Bachelor of Science - BSc, Computer Science

Sept 23 - Present
