SUMMARY

Front-end developer with 4 years of experience building web and mobile applications using React, React Native, and TypeScript. Comfortable working across the full stack with the MERN stack when needed. Prioritize writing code that's easy to understand, change, and built to solve specific user needs.

PROFESSIONAL EXPERIENCE

NIBO   **LAGOS, NIGERIA**
Lead Frontend Developer   **October 2024 - Present**
- Initiated and led the development of a new system architecture, streamlining the management of complex spatial data requests; achieved measurable outcomes, including reducing response times per request during trial phases.
- Created manufacturer metrics dashboard that increased sales by 23% by tracking customer behavior patterns and purchase trends. Enabled data-driven decisions that reduced response time to customer feedback from 72 to 24 hours and improved product adoption rates by 35%.
- Configured GraphQL to replace REST API endpoints, reducing API requests by 67% and decreasing average page load time from 3.2s to 1.1s, while improving data consistency across the application.
- Established a clear, logical folder structure in our React/TypeScript project to keep code organized and easy to navigate.

AJE   **ISTANBUL, Turkey**
Frontend Web Developer   **September 2024 - Present**
- Played a key role in the end-to-end development of a web application, leveraging modern web technologies to create a user-friendly interface and seamless functionality. This initiative significantly boosted the application's market outreach potential by 80%, enabling broader audience engagement and driving business growth.
- Implemented a real-time chat interface with complete trade process integration, enabling seamless communication between users and supporting actions such as offer creation, negotiation, and transaction finalization within the chat environment.
- Developed and maintained reusable React components and hooks library, streamlining feature development across multiple projects and reducing duplicate code by 40%.
- Designed a visually appealing and highly effective email template for push notifications, focusing on personalization and clear call-to-actions, resulting in a 75% improvement in user engagement and satisfaction.

PROJECTS

BEYOU(LINK)   **November 2024 - February 2025**
- Engineered a personalized learning platform using React.js and Gemini AI API, enabling content generation based on individual learning styles and goals
- Built responsive UI components using Tailwind CSS, resulting in consistent experience across devices with 100% all round lighthouse score.
